Subject: Microsoft Settlement

For the time been although not yet clearly and/or fully satisfied to the masses specially Microsoft competitors the mear fact that our legal system team is involved the media exposure industry people and those who care to know and have become aware of such litigation court preceding and final agreement this primary settlement should be carry out. Should Microsoft ever fail to maintain its agreement then the Court shall have evry excuse to excecute a much tougher ruling and perphaphs the break up of Microsoft. By the fact that all the attorneyes general of all the states (The Govertment representatives) have all agreed on this deal and in order not to reduce the great technology leadership of Microsoft not only in the United States of America but the world their market share and exposure its competitors must not only think of themselves and their bottom lines (Dollars) but how conjunctevly can create a better fairer and more advantegious platform for all to work in and therefore continue providing the local and foreign markets with their great selection of products while at the same time maintaining Microsoft under a microscope so that the big M does not violate competetive laws and/or agreements.
